Education

Sardar Patel Institute of Technology Mumbai, MH
Bachelor of Technology in Computer Science and Engineering — ***GPA:*** *7.04 / 10.00* *Expected May 2027*

Core Projects

MLCloudScheduler – Forecast-Driven Cloud Autoscaler 2026
PyTorch, Scikit-learn, Django, React, GitHub Actions
- Built a CNN-BiLSTM demand forecaster (RevIN normalisation, attention, P50/P90 quantile heads) trained on 101 Bitbrains production VMs, cutting forecast error 20.3% vs. persistence (MAE 3.78 vs. 4.80 pp) and winning on 30 of 31 held-out VMs, 30 never seen in training.
- Validated results with a leak-free 70/10/20 time-ordered split, 95% confidence intervals and Holm-corrected Wilcoxon tests ($p < 0.001$); outperformed ARIMA and NLinear on all 31 VMs, with ablations isolating the impact of each design choice.
- Produced calibrated P90 forecasts (90.2% coverage vs. 90% target) in 3 ms each, 27× faster than gradient boosting, served via a Django REST API and React dashboard with 208 automated tests in CI.

ApnaGhar – Blockchain Real-Estate Platform 2025
React, TypeScript, Django, PostgreSQL, Hyperledger Fabric, IPFS
- Shipped 25 features on a React 18 + TypeScript frontend and Django REST Framework backend with PostgreSQL, JWT/Google OAuth and Razorpay payments.
- Integrated Hyperledger Fabric 2.5 smart contracts with 8 verification methods and SHA-256 hashing on IPFS for immutable property audit trails, with role-based access control on uploads.
- Engineered a RAG chatbot over property and legal documents using vector embeddings with context-filtering guardrails; deployed via Docker Compose, Vercel and Render.

F1 Fantasy Platform – Cloud-Native Microservices 2025
React, Node.js, AWS, Terraform, Docker, Jenkins
- Provisioned AWS infrastructure (EC2, S3) as code with Terraform to host a Node.js microservice and React frontend, binding an Elastic IP for a stable endpoint across restarts.
- Built a Jenkins CI/CD pipeline with Docker and GitHub webhooks, running unit tests on every commit for zero-downtime releases.
- Load-tested with 10+ concurrent users, profiling request handling to find and fix race conditions and memory leaks.

Experience & Leadership

Oculus Mumbai, MH
Head of Operations *2024 – 2025*
- Led a cross-functional team to manage end-to-end operations and deliverables, ensuring seamless execution and mitigating operational bottlenecks across multiple initiatives.
- Partnered with internal stakeholders, vendors, and core committee members to streamline logistics, demonstrating strong communication and strategic decision-making skills.

Certifications

JPMorganChase Investment Banking – Job Simulation, Forage (2026)
Goldman Sachs Risk Management – Job Simulation, Forage (2026)
Trinity College London – Grade 5, Performing Text, with Merit (2019)

Skills and Languages

Programming Languages: Python, Java, JavaScript, C, C++, SQL
Spoken Languages: English (Professional), Marathi, Hindi, Konkani
Soft Skills: Leadership, Communication, Teamwork, Analytical Thinking, Problem-Solving, Presentation
Databases & Storage: PostgreSQL, MongoDB, MySQL, SQLite, IPFS (Pinata)
Frontend: React.js, Next.js, Tailwind CSS, Vite
Backend & Distributed: Django, Node.js, Express.js, Hyperledger Fabric, REST APIs, System Design
Data Science & Analytics: PyTorch, Pandas, NumPy, Scikit-learn, AI/LLM Integration, Data Analytics, Risk Modelling
DevOps & Tools: AWS, Terraform, Docker, Jenkins, CI/CD, Git, MS Excel, PowerPoint, Word
